

SRI SARVAJNA COLLEGE OF EDUCATION

Vijayanagar, Bengaluru – 560040

ENERGY CONSERVATION CELL 2023-24 (BATCH 2022-24)

ANNUAL REPORT

The Energy Conservation Cell of Sri Sarvajna College of Education was formed mainly with the intention of creating awareness and encouraging everyone at the campus to save and prevent the waste of energy.

The Energy Conservation Cell of the institution in the beginning of the academic year, oriented everyone at the campus on its energy policy document. The cell periodically reminded everyone at the campus to use public transport, use water and electricity judiciously and dispose waste sensibly. The cell also brought the water leakage to the notice of concerned personnel and ensured the addressal of the issue on time.

The cell took key initiatives and assisted the different cells/clubs/committees and Students Activities Centre (SAC) of the institution in organizing the programmes and activities with due focus on energy conservation and sustainable use of resources.

The cell along with science club organized World Environment Day on 5th June 2023. The theme for 2023 was "Solutions to Plastic Pollution". The event began with a paper presentation on the significance of World Environment Day, which also emphasized the detrimental effects of plastic pollution. Following this, student-teachers performed a short skit on the "7Rs" (Reduce, Reuse, Recycle, Refuse, Rethink, Repair, and Repurpose), creatively illustrating practical ways to manage plastic waste. An informative session on medicinal plants was conducted, which helped to educate everyone on the benefits and sustainable usage of these plants. A group song on celebrating nature further enlivened the event. The emphasis on using eco- friendly materials throughout the program accentuated institution's commitment to sustainable practices.

During the community living camp organized by the institution from 30th September to 2nd October 2023 at Janapada Loka, Ramanagara, the Energy Conservation Cell made efforts to make the event eco-friendly. Apart from the other activities of the camp, the cell actively involved everyone in cleanliness drive at the campus.

The cell organized World Energy Conservation Day on 14th December 2023. During the occasion there was a paper presentation by a student-teacher that highlighted the importance of daily usage of energy and need for its conservation.
